States. The bulletin says:
The population of the United States on June 1, 1890, as shown by the first count of persons and families, exclusive of white persons in Indian Territory, Indians on reservations, and Alaska, was 62,480,540. These figures may be slightly changed by later and more exct compilations, but such changes will not be material. In 1880 the population was 50,155,783. The absolute increase of the population in the ten years intervening was 12,824,757, and the percentage of increase was 24,57. In 1870 the population was stated as 38,558,371. According to these figures the absolute increase in the decade between 1870 and 1880 was 11,597,412, and the percentage of increase was 30.08.

The general law governing the increase of population is, that when not disturbed by extraneous cases, such as wars, pestilences, immigration, emigration, etc., increase of population goes on at a centinually diminishing rate. The operation of this law in this country has been interfered with in recent years by the late war, which, besides the destruc-I can show you the prettiest line of Men's and Youth's pants ever inspecte I, and for less money.

DYNAMITE CARTRIDGES.

Auether Experiment Made With Dr. Jus-SYRACUSE, N. Y., Nov. 3. —Another experiment with Dr. Justin's dynamits cartridge was made at Perryville in the presence of a number of experts. The shell was similar to the one used the last time, excepting that it was bored out of solid steel and had no blow holes, and was three-fourths instead of five-

Thermometric apparatus in the shell measured the force of the heat exerted, and dynometric calculations showed the force and direction of the explosive power behind it and the influence on the inner dynamite cartridge. The shell was opened and testified to the correctness of Dr. Justin's theory of the late explosions in the gun.

Another test will be made with the same shell, and at a third test dynamite will be again used, the inventor being confident that all difinities have now been removed in firing charges of dynamate from any smooth-bore or rifled to the plant of the pilot boat have done exerciting.

Sixteen other men were hanging to the same plank. Che by one they grew faint and numb, relinquished their hold and drifted away. Some sent messages to their families in Massachusetts. When daylight came he was alone on the plank, with no help in sight. He felt that he could not bear up much longer and resigned himself to die, but suddenly he heard a shout, which he was too weak to answer, felt himself picked up, knew that he was safe and fainted away.

It was 7 o clock when the pilot boat picked him up and the others who had lived through that awful night and who like him, were drifting about on wreckage.

Capt Allen, the engineer and cook, Walker said, had taken the boat and pulled away, leaving everybody else on board.

KILLED IN AN ASYLUM

ough Evidence at Mand to Indict Wood for the Murder of Blount. RICHMOND, Ind., Nov. S .- The examination of witnesses in the asylum mur-der case has not been concluded by the grand jury, but enough evidence has already been given to warrant the in-dictment of J. H. Wood for the murder of Jay Blount,

of Jay Blount,
Another autopsy is to be made of
Blount's body at Blountsville. This
was ordered by Prosecuting Attorney
Jackson, because of certain complications arising by reason of the incompletages of the former autopsy.

It is supposed that no one will be implicated with Wood in the murder,
while there are many false rumors concerning the management of the asylum,
which are due to the effort to make
pointical capital.
